

INTRODUCTION TO SOFTWARE DEVELOPMENT AND TESTING

WHAT DO I KNOW? QUESTIONNAIRE

Below are a series of questions that we will be exploring throughout this course. But before you get started on the course, it's good to take stock of what you already know and identify areas you don't. Take 10 minutes to have a go at answering these questions now and try to answer honestly and truthfully. This questionnaire is for your eyes only and so the goal isn't to find the "right" answers but to help you explore your current understanding. You can then return to these questions at the end of the course and reflect on all you've learnt.

1. WHAT IS SOFTWARE DEVELOPMENT?

2. HOW DOES A TEAM DEVELOP SOFTWARE?

3. WHAT ROLES EXIST IN A SOFTWARE DEVELOPMENT TEAM?

INTRODUCTION TO SOFTWARE DEVELOPMENT AND TESTING

4. WHAT IS TESTING AND WHY DO WE NEED IT?

5. HOW DO TEAMS TEST?

6. WHAT MAKES A GOOD TESTER?
